

Africa represents approximately 14% of the world's population, but it is home to more than 1 billion people who live in poverty and are at risk of hunger and disease. The continent is also home to some of the world's most vulnerable populations, including children and the elderly.

You can help in eradicating hunger, poverty and disease by donating towards feeding the multitudes. We will use your donation to provide food and medical supplies to the most vulnerable people in the world.
